ABOUT US

Mustdam Industrial Gases & Refrigerants Trading Company is a specialized entity providing comprehensive gas solutions, with a primary focus on helium, one of the essential gases used across industrial, commercial, and medical sectors.

Mustdam operates through an advanced operational infrastructure that includes modern storage and transportation systems, adhering to the highest safety and quality standards to ensure supply efficiency and continuity. The company aims to build long-term partnerships with its clients by offering flexible and innovative industrial gas solutions, with a particular focus on supplying and distributing helium in its various forms and applications, whether in medical, industrial, or entertainment uses.

OUR VISION

To be the leading regional company in the industrial and refrigerant gases sector, establishing ourselves as a key and trusted provider of helium, by delivering innovative and sustainable solutions that rival major global companies like Linde plc.

We aim to build an integrated system leveraging the latest technologies in gas storage and distribution, with continuous improvement in operational efficiency and service quality, ensuring high-performance and fully reliable solutions for industrial, commercial, and medical markets.

OUR MISSION

At Mustdam Industrial Gases Company, we strive to provide comprehensive and reliable solutions in the field of industrial and refrigerant gases, with a special focus on helium.

By adhering to the highest standards of quality and safety, we deliver products and services that meet our clients' expectations and support the sustainability of their businesses.

OUR SERVICES

Mustdam Industrial Gases Company offers a comprehensive range of services in the field of industrial and refrigerant gases, with a special focus on the supply and management of helium. We are committed to meeting the needs of various sectors through flexible, safe, and efficient solutions.

WHAT WE OFFER

01 HELIUM

02 INDUSTRIAL GASES

03 Cryogenic Gases

04 AMMONIA

05 SPECIALTY GASES

06 REFRIGERANT GASES

مستدام
mustdam

HELIUM

High-purity helium for medical, industrial, and entertainment applications, delivered safely and efficiently, with flexible supply solutions to meet market needs.

INDUSTRIAL GASES

OXYGEN, NITROGEN, ARGON, ACETYLENE AND CO2.

CRYOGENIC GASES

Liquid Nitrogen, Liquid Oxygen, Liquid CO2, Liquid Argon.

مستدام

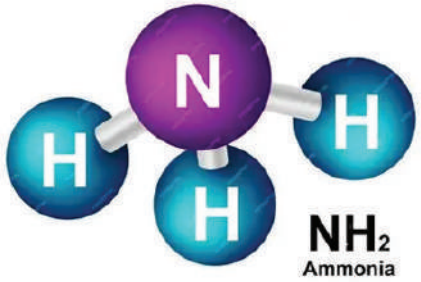
AMMONIA

High-quality ammonia for industrial and commercial applications, including refrigeration, fertilizer production, and chemical processes, delivered safely with reliable supply and compliance with international standards.



SPECIALTY GASES

Specialty gases for precise industrial, laboratory, and research applications, including calibration, analytical, and high-purity gases, provided with strict quality control and tailored solutions to meet specific client requirements.

REFRIGERANT GASES

MUSTADAM Refrigerant division specializes in packaged and bulk supply of a wide range of refrigerant gases we provide a reliable supply of high-quality refrigerants to use in new equipment and retrofit opportunities with the ability to reduce their overall environmental impact classified into synthetic (HFCs, HFOs) and natural (CO_2, ammonia, hydrocarbons) compounds, with current industry trends moving toward low-GWP
